

do it green is our recycling program, which contributes to our customer's sustainability efforts.

This program is intended for Corporate/Office Buildings, Government offices, Commercial Printers/Paper Converters, Educational Institutions, Financial Institutions, etc.

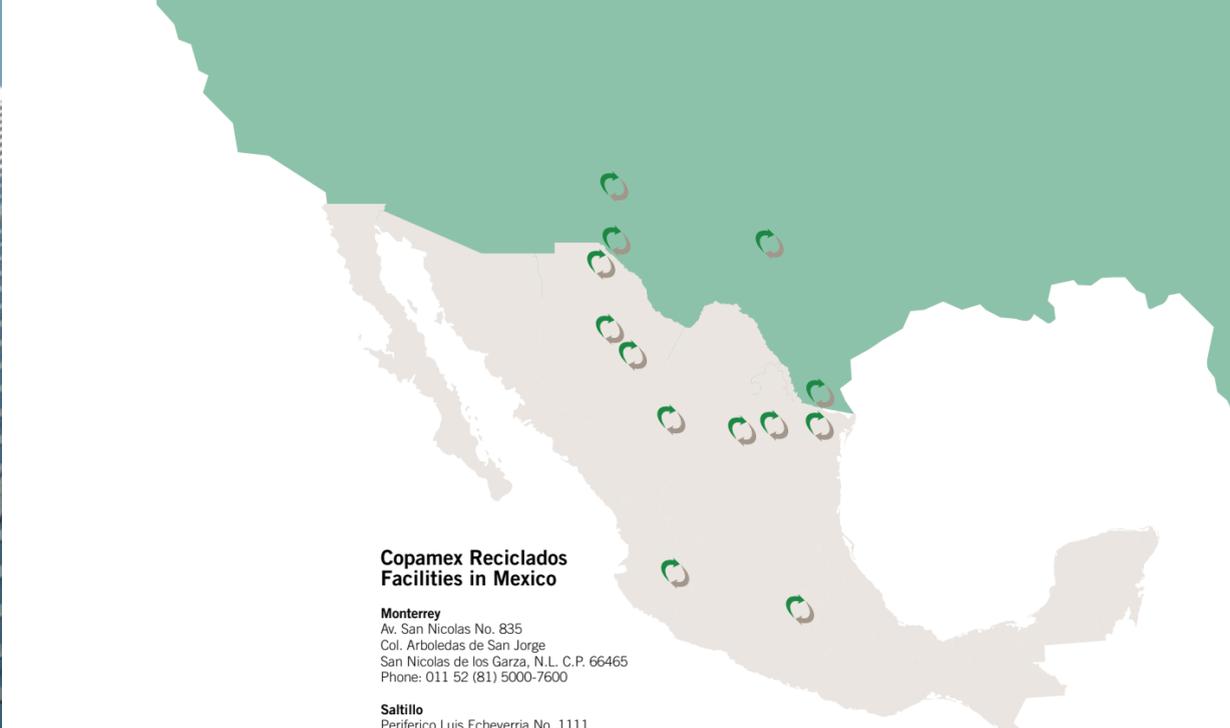

do it green adapts to the needs of each client with its main benefits being:

- Income growth by the sale of your recyclables.
- Saving landfill space.
- Reduction in the cost of waste disposal.
- Detailed reporting on all collected materials.
- Environmental Report provided.
- Closed Loop Paper Recycling.
- Shredding service provided in order to help your company comply with privacy and confidentiality regulations.
- Training and staff consultation.

do it green includes the recycling of Paper, Cardboard, Plastic and Aluminum containers. It creates a conscious awareness in our clients' personnel helping them to adopt the Recycling Culture.

"Closed Loop Recycling"

do it green promotes Closed Loop Paper Recycling, which consists of the recovery and transformation of old paper into new paper that returns to our customers at the end of the value chain. This is a step in the right direction towards sustainability.

YOUR LIFE RECYCLING

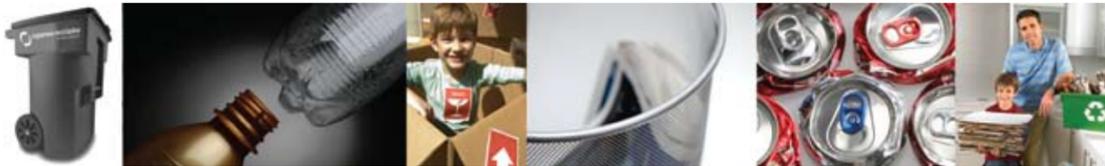

a copamex group company www.copamexreciclados.com

GIVING YOUR WASTE A SECOND CHANCE...

Copamex Group cares about the environment and its natural resources, therefore through direct actions, contributes to improve and preserve the environment allowing for ecological balance.

Master Fibers provides integrated recycling solutions for non-hazardous waste. Our programs promote the recycling culture, thus providing direct benefits for the preservation of our environment.

For over 30 years, Master Fibers has continued to offer recycling services for the following materials: cardboard, paper, newspaper, plastic (most categories), metals (ferrous and non-ferrous) and pallets. **do it green** is Master Fibers' program for the comprehensive management of office waste.

paper^{pallets} metals
office waste
newspaper
plastics cardboard

Master Fibers offers personalized service, scheduled and timely pick-ups, on-site equipment, detailed reporting of all collected materials, environmental reporting, reliability, and timely payments. In addition to these benefits, you will also receive income from the sale of recyclables, savings on the cost of waste disposal, optimization of space, and the ability to promote good housekeeping practices.

Our services

We work with each customer to develop logistics adapted to their needs in order to ensure excellent service in waste management. Not only do we monitor the recycling process with personalized attention, but we also provide the proper onsite equipment needed by each customer. Our facilities have the suitable infrastructure for handling and processing waste ensuring any and all materials will not be misused or mishandled.

As part of our quality policy and our commitment to world class service, we guarantee the accuracy of all weighed materials, we can provide detailed reporting on all materials collected and we are also able to provide an environmental report. We welcome our customers with open access to any of our facilities at anytime for auditing purposes.

Benefits of our programs

Master Fibers generates additional income through the sale of your waste, as well as savings on your waste disposal expense. Not only will your business have an effective and efficient management of

waste, it will also promote organization and good housekeeping practices. Master Fibers is fully bonded, insured and in compliance with all local, state and federal regulations.
